

Why are math books so unhappy?

Write an integer for each situation. Find the point on the number line that corresponds to the integer.

Write the letter of the problem above the number at that point.

- | | |
|------------------------------|------------------------------|
| (L) 1 unit to the left of 0 | (V) 8 steps backwards |
| (E) the opposite of -13 | (C) 10 miles per hour faster |
| (T) 1 unit to the right of 0 | (H) 10 km below the surface |
| (T) the opposite of 15 | (H) a withdrawal of \$14 |
| (E) 7° below zero | (P) up 8 flights of stairs |
| (R) a gain of 9 lbs | (L) score 12 points |
| (M) a deposit of \$14 | (A) a debt of \$9 |
| (Y) 12 ft below sea level | (E) 13 years ago |
| (A) a loss of 4 yd | (C) at sea level |
| (C) 4 points higher | (B) 11 steps forward |
| (F) a gain of 5 yd | (S) an increase of 15° |
